

QUANTUM REALITY CAPTURE

2025 RECAP

➤ A Note to Our Clients :

As we close out the year, all of us at Quantum Reality Capture want to extend a sincere thank you to our clients and partners. This year has been one of growth, innovation, and strong collaboration—and that wouldn't be possible without you. We're excited to carry this momentum into the year ahead and continue delivering reliable data, responsive service, and cutting-edge reality capture solutions.

✓ We're Moving!

Due to our continued growth, Quantum Reality Capture is expanding and will be moving to a new office at the historic Faber House in downtown Charleston. An official email with our new address details will be sent in January once we are fully moved in. All phone numbers, emails, and services will remain the same, with no disruption to ongoing projects

Highlight : AIA Boston

We had an incredible experience exhibiting our first booth at the AIA Boston Expo. It was a great opportunity to connect with architects and industry partners, share what Quantum Reality Capture does best, and build new relationships. Thank you to everyone who stopped by and helped make it such a success. We're excited to continue the momentum and look forward to the 2026 AIA Expo in San Diego!

Breaking Records :

Using NavVis technology, our team completed 1,125 scans across 299 sites, capturing over 25.6 million square feet and more than 84,000 panoramas. With just two NavVis devices, we delivered data at an unprecedented scale—setting new benchmarks for efficiency, accuracy, and growth at QRC.

➤ Giving Back Together :

Giving back was a highlight of this year at QRC. Our team proudly came together to support the St. Jude Virtual Walk/Run and Trident United Way: Days of Caring, making a meaningful impact while strengthening our team. We were also thrilled to host our second annual Toys for Tots drive, and through our partnership with Bright Oak Preschool, collect over 150 toys for local children and families.
